# Acknowledge

As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the adorable supports during the time in project.

Beside several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 01.

# Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings many meaningful knowledges. Through this project, we have opened up a lot of new knowledge and technology in the field of watches as well as the basic structure and operation of a website, especially the Single Page Application website genre.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

<b>Design Plan:</b> Alberto Clocks	<b>Document Name:</b> Problem Definition	<b>SWD/Form</b> No.01/PD/Ver1.0
<b>Effective Date:</b> 14-07-2022	<b>Version</b> 1.0	<b>Page No:</b> 1 of 20

## Problem Definition

### 1. Problem Definition:

Alberto Watch Company is a full-service watch repair, appraisal, and retail store – offering the finest selection of luxury timepieces. Offering an unparalleled selection with first-class service. Alberto also carries a wide selection of brand-new watches such as Michael Kors, Rolex, Citizen Eco-Drive, Bulova and more!

### 2. Identify the problem:

Alberto Watch Company:

- ✓ Retail Store of luxury timepieces
- ✓ Online shopping easily
- ✓ Sell all types of watch (Vintage, Luxury, Smart Watch)
- ✓ Provide full-service watch repair (All types of watch)
- ✓ In charge of appraisal (Private check is included-could cost fees)
- ✓ Provide the first-class service of all customers

# Customer Requirements Specifications

## User:

### Input:

- Member Data
- Information about the watch
- Feed back
- Add to cart

### Process:

- Check member information
- Watch name search
- Watch brand search
- Looking for watch's type
- Looking for watch's features
- Watch price search
- Promo code search
- Looking for similar watch models
- Adding to cart

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No:</b> 01	LE THANH NHAN
<b>Signature</b>

## Webmaster:

### Input:

- Administrator login information
- Add/Edit/Delete watch's image
- Add/Edit/Delete watch's brand
- Add/Edit/Delete watch's name
- Add/Edit/Delete watch's data

### Process:

- Check administrator credentials
- Add/Edit/Delete watch's image
- Add/Edit/Delete watch's brand
- Add/Edit/Delete watch's name
- Add/Edit/Delete watch's data

### Output:

- Sign in success or failure message
- Notice whether add/edit/delete watch information succeeds or fails

## Hardware / software requirement:

### Software:

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, JavaScript, jQuery, AngularJS, XML
- Data Store: JSON files or TXT files

Other Requirements:

- Operating Portal: Windows
- Browsers: Edge, Chrome, Mozilla Firefox, Safari

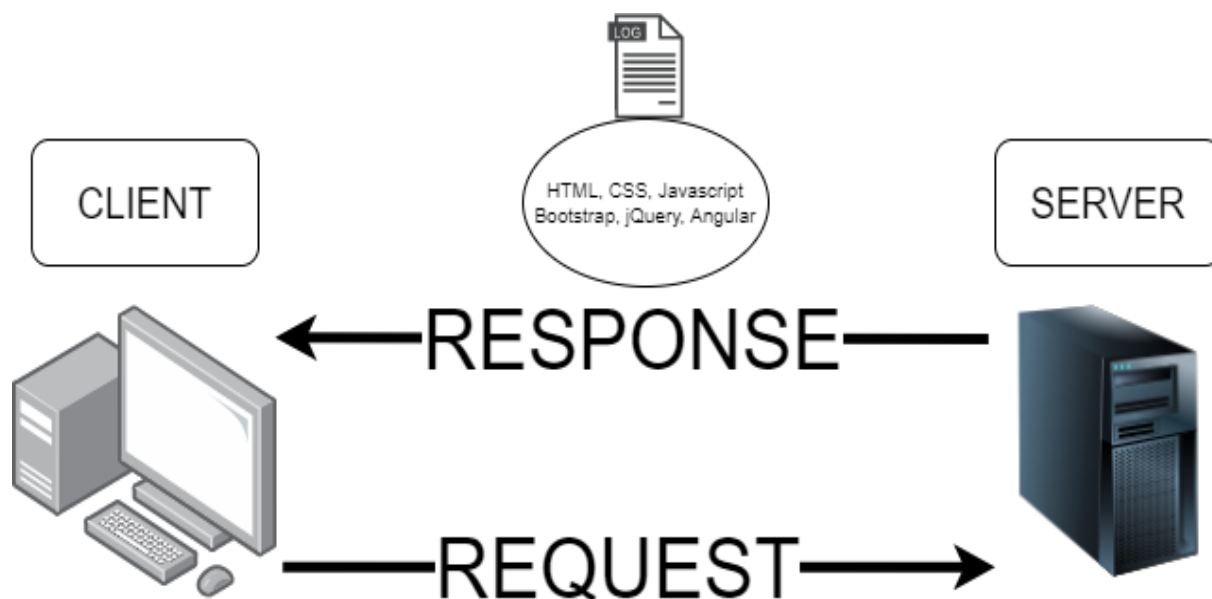

### Hardware:

- Intel Core i3/i5 Processor or higher
- 8 GB RAM or above
- Color SVGA
- 500 GB Hard Disk space
- Mouse
- Keyboard
