

PROJECT: ALBERTO CLOCKS
GROUP NO: 01 BATCH: T1.2204.E1

A. SYSTEM REQUIREMENTS:

Sr.	Item	Description
1.	Operating system	Windows 7, 8, or higher
2.	Hardware	Pentium 166 or better with 64 Megabytes of RAM or better
3.	Web Browser	Version in later of: Edge 44, Firefox 40, Chrome 55, etc...
4.	Fonts	Standard font Unicode: Arial, Tahoma, Lucida Console, Times New Roman, etc...
5.	Other requirement	A working internet connection.

Notes: Do not install IDEs (Integrated Development Environment) on the system such as MS Visual Studio, Jbuilder, Dreamweaver, etc.

B. PROGRAM INSTALLATION

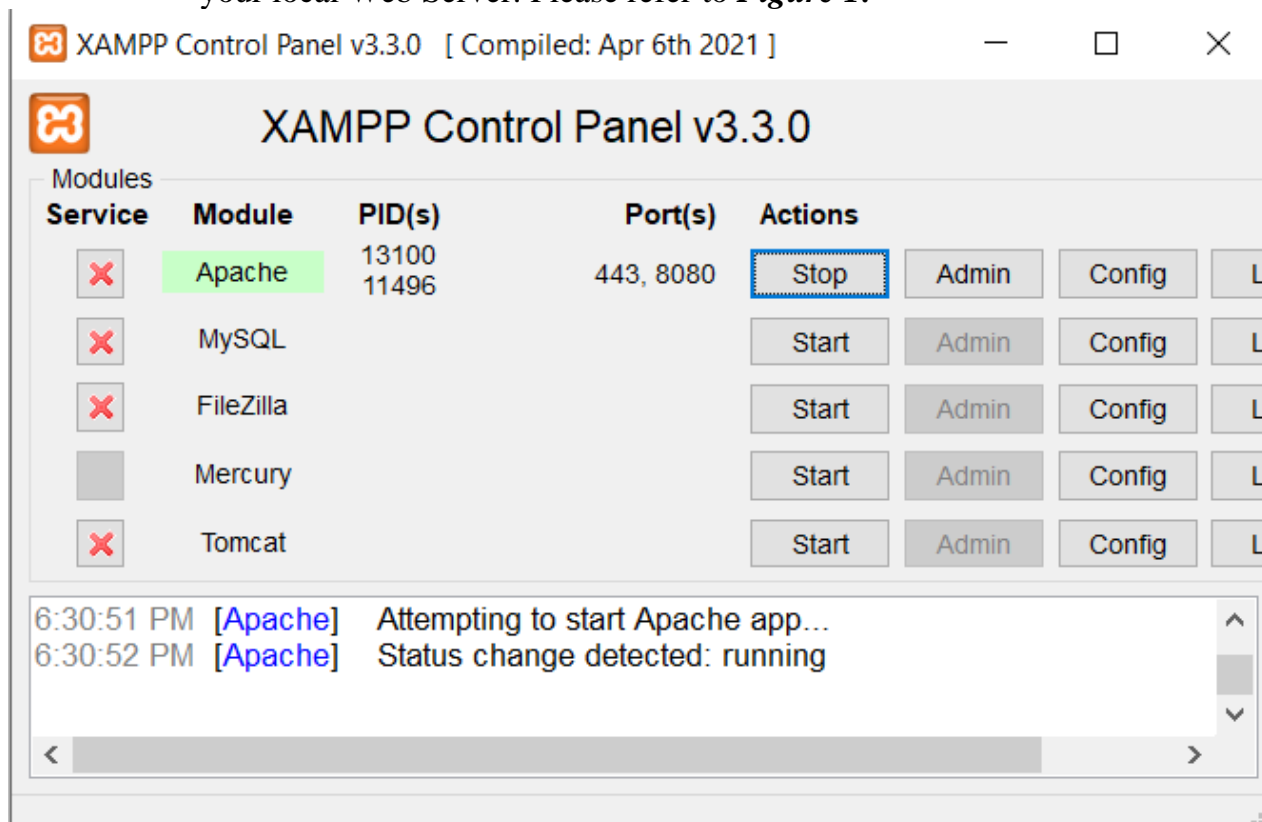

Option 1:

- Step 1. Extract *eProject SEM01_T1.2204.E1_AlbertoClocks_Group01_Final Submit.rar* by all files into your directory (for example Drive D:\)
- Step 2. Open **eProjectSEM01_T1.2204.E1_AlbertoClocks_Group01_Final Submit** folder → open **Source Code** folder.
- Step 3. Open *“Index.html”* with **Visual Studio Code** and run with **Live Server**.
(If you run directly Index.html with browser, the web will not run correctly.)
(Please use Chrome or Edge browser for website to have the best experience.)
- Step 4. In case you cannot run the website by instructed as step 4, this is a back-up step for you. Please access our webpage with this link <https://alberto-store.netlify.app/>

(*) - Installation documentation is included with the installation disc, should follow the proper format which have clear and complete content for anyone to perform.
- The Center performs the installation and give a notification of the protection list for successfully. Project not successfully installed is Fail.

Option 2:

- Step 1. Download and install XAMPP from this link:
<https://www.apachefriends.org/download.html>.
- Step 2. Ensure that **Apache Web Server** is selected during installation.
- Step 3. Start XAMPP Control Panel.
- Step 4. Launch or start **Apache** in XAMPP Control Panel. This will establish your local Web Server. Please refer to **Figure 1**:

- Step 5. Change Port (**if you can't run successfully at Step 8**) by clicking on **Config** XAMPP Control Panel and choose **Apache (httpd.conf)**. There will be a note opened, now you will need to search for 2 lines, first is **listen**, second is **Servername localhost**, then you will need to change both of them into **8080** (or what number that you want just to be different from **80**). Please refer this **Figure 2 and 3**:

Figure 2:

```
#Listen 12.34.56.78:80
Listen 8080
```

(*) - Installation documentation is included with the installation disc, should follow the proper format which have clear and complete content for anyone to perform.
- The Center performs the installation and give a notification of the protection list for successfully. Project not successfully installed is Fail.

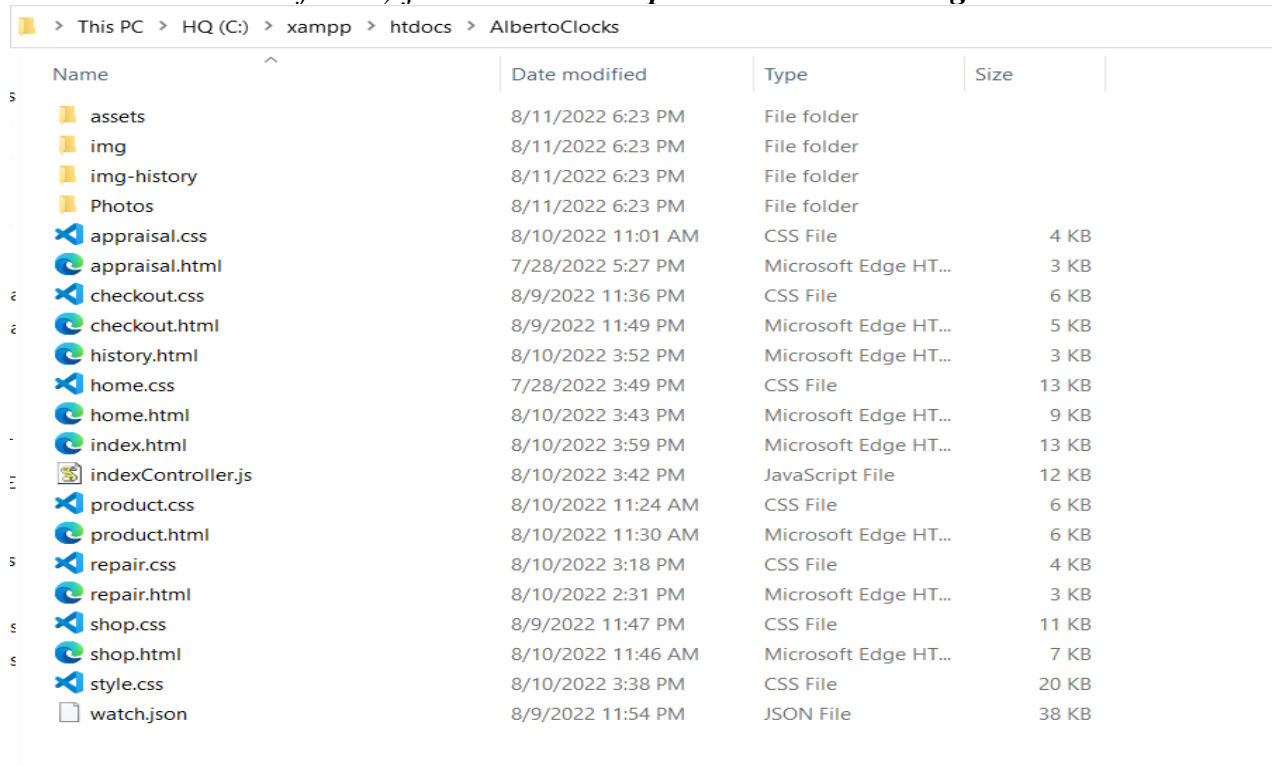

Figure 3:

ServerName localhost:8080

- Step 6. Create a new folder then name it “*AlbertoClocks*” in **htdocs** folder under XAMPP (By default, the pathname should be as of: “*c:\xampp\htdocs*”). Please refer to **Figure 4**:

- Step 7. Extract all the content of “**Source Code**” folder of the .RAR file “*eProject SEM01_T1.2204.E1_AlbertoClocks_Group01_Final Submit.zip*” into the new folder named “AlbertoClocks” (under the *htdocs* folder) just created in **Step 5**. Please refer to **Figure 5**:

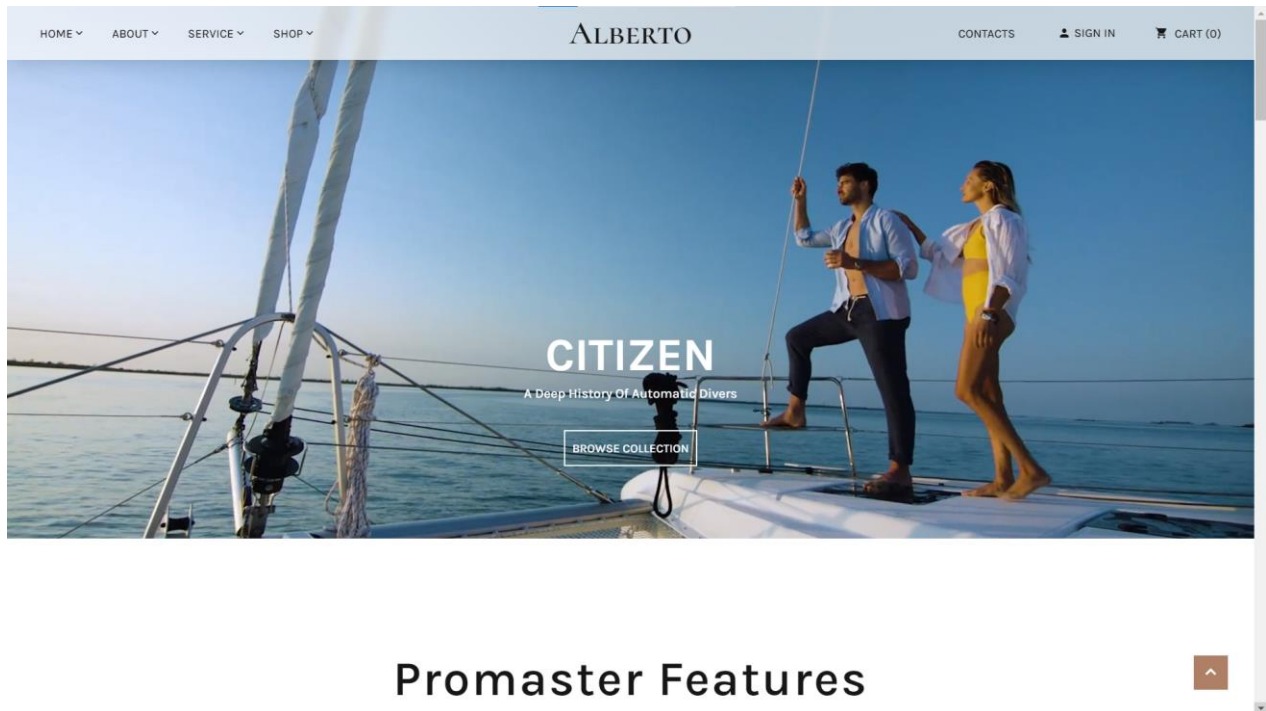

This PC > HQ (C:) > xampp > htdocs > AlbertoClocks

- Step 8. Open your web browser (such as Microsoft Edge), then type the following address: <http://localhost:80/AlbertoClocks/index.html> or simply just <http://localhost/AlbertoClocks/index.html>. [Please check over your **Apache local Port** before execution. The default port of Apache is “80”. In case of this port has been modified earlier, please edit the above address accordingly. For example: if the modified port was 8080, then the accessible address should be “<http://localhost:8080/AlbertoClocks/index.html>”].
(NOTE: if you do not know how to change port of XAMPP, please go back to **Step 5**)

(*) - Installation documentation is included with the installation disc, should follow the proper format which have clear and complete content for anyone to perform.
- The Center performs the installation and give a notification of the protection list for successfully. Project not successfully installed is Fail.

C. SUCCESSFUL TEST

- The file is loaded successfully
- Homepage should be displayed as described in the documentation.

-
- (*)
- Installation documentation is included with the installation disc, should follow the proper format which have clear and complete content for anyone to perform.
 - The Center performs the installation and give a notification of the protection list for successfully. Project not successfully installed is Fail.
